

"SOFTWARE QA ENGINEERING AND TESTING INTERNSHIP"

Valeriia Bauer | bauer@edi.gmbh

16.10.22

To Whom It May Concern:

I am writing this reference for Katrin Haper, who has successfully completed private internship under my (Valeriia Bauer) mentorship in association with EDI GmbH. I have known Katrin Haper for over a year in my capacity of mentor. Katrin Haper took "Software QA engineering and Testing" course from me and has been the most outstanding intern I had pleasure to work with. Katrin Haper's attitude, personality and dedication have been impressive throughout the duration of cooperation

Katrin Haper has quite an amount of strengths to offer to an employer. She is always interested in producing the best result possible in a given situation. She makes sure that her work has been properly processed by the development team and taken care of. For example, she has been a private beta tester for the new version of EDI GmbH service Technical Drawings and has found couple bugs that were not noticed by QA engineers within the company. Katrin Haper is also a very fast learner. She has incredible dedication to understanding things and providing proper documentation including test plans, test cases, bug reports and diagrams needed for the good testing processes and quality assurance.

In conclusion, I would highly recommend Katrin Haper. Her performance during cooperation and internship is a great indication of how she would perform in the available position. Katrin Haper will be an extremely positive addition to your organization. If you need any additional information, feel free to contact me at telephone or by email at bauer@edi.gmbh anytime.

Sincerely,

Valeriia Bauer

QA mentor, Team Leader of Applications team, Senior application developer
